

**Mr. Harsh Mehta**  
**Director of International Business**

Mr. Harsh Mehta joined Revital Healthcare in April 2021, following his experience in the financial services sector in London. He holds a BSc in Banking and Finance from the University of Leicester, a top 200 globally ranked university.

At Revital, Mr. Mehta initially spearheaded the company's international market expansion, establishing export channels for the first time in Revital's history to countries including Germany, Austria, Switzerland, the United Kingdom, Canada, and Morocco.

Driven by a passion for local manufacturing and health systems strengthening, Mr. Mehta has since played a leading role in advancing strategic partnerships with global agencies such as USAID, the Bill & Melinda Gates Foundation, WHO, PATH, UNITAID, PEPFAR, and the Global Fund. He has led the delivery of high-impact, donor-supported projects, most notably as project lead for a USAID-funded initiative to manufacture Africa's first HIV Rapid Diagnostic Test Kits, and as a co-inventor of Africa's first patented 4th Generation Auto Disable Syringe with support from the Gates Foundation.

Mr. Mehta's work centres on creating an integrated approach to healthcare resilience in Africa, identifying sustainable funding models, technical collaboration, and commercialisation strategies to build complete, end-to-end value chains.

Prior to his current role, he held positions in the UK managing investment portfolios valued between £2M and £10M, and gained international exposure through his early work in Shanghai, China.
